

Harshit Sinha

Product Builder & Automation

sinharharshit67@gmail.com | +91-9653043939 | India · Remote-ready
linkedin.com/in/harshit-sinha98 | github.com/Harshitsinha98

Product builder and automation specialist. I design, build, and ship web products end-to-end using AI-assisted development — from idea and UX to third-party integrations and deployment. Background in technical operations and field infrastructure management. Currently deepening core software engineering fundamentals.

EXPERIENCE

Product Builder — AI-Assisted Development — Independent Projects

2023 — Present

Remote

- Design, build, and ship web products end-to-end using AI-assisted development, from idea and UX through integrations and deployment
- Shipped Saran Tax Solution (live, generating real inbound leads); built Lead Management, BreakIQ, a temple site, and a jewelry store (deployed, in pre-launch)
- Own the full product journey: decisions, third-party integrations (payments, shipping, CMS), and deployment on Vercel
- Actively building core software engineering fundamentals alongside AI-assisted delivery, to own more of the stack independently over time

Software Engineer / Analyst — Capgemini

Apr 2024 — Present

India

- Build and maintain Python & RPA automation workflows that cut repetitive manual effort across operations
- Write scripts and reporting pipelines (Python, Excel) to surface operational KPI trends for stakeholders
- Support AI / chatbot integration efforts to improve end-user resolution journeys
- Coordinate with L3 and cross-functional teams on incident resolution across client accounts

Field Operations Engineer — Indus Towers

Dec 2022 — Jan 2024

India

- Managed field operations for 150+ telecom tower sites across an assigned region
- Delivered 99.9% network uptime through preventive maintenance and fast fault resolution
- Coordinated on-ground teams and vendors for repairs, power, and site upkeep
- Ran root-cause analysis on recurring faults to reduce repeat outages

SELECTED PROJECTS

Saran Tax Solution

Next.js · Tailwind · Sanity CMS · Resend

Tax consultancy marketing site — live, generating genuine inbound leads through organic search.

Lead Management System

Next.js · TypeScript · PostgreSQL · Node.js

End-to-end lead lifecycle platform — role-based access, assignment rules, automated follow-ups, pipeline analytics. Deployed.

SKILLS

Build With: Next.js, React, TypeScript, Tailwind CSS, Node.js, Express

Data: PostgreSQL, MongoDB, MySQL, Prisma

Deploy & Cloud: Vercel, Git, CI/CD, Linux

AI & Automation: AI-assisted development, OpenAI API, Python, RPA, n8n

Operations: Incident response, uptime & monitoring, process automation

EDUCATION

B.Tech — Electronics & Communication Engineering

BBDNITM, Lucknow | Class of 2022

CERTIFICATIONS

- Python Data Structures — Coursera
- Google Workspace Advanced Administration
- Business Transformation with Google Cloud
- ITIL Foundation Principles
