

Harshit Sinha

Full-Stack Engineer · Product Engineer · Automation & AI Integration

India (Remote-first) | +91-9653043939 | sinhaharshit67@gmail.com | linkedin.com/in/harshit-sinha98 | github.com/Harshitsinha98 | harshitsinha.com

PROFESSIONAL SUMMARY

Full-stack engineer with 3+ years of experience across enterprise infrastructure operations, process automation, and independent product engineering. Currently drives Python/RPA automation and AI-chatbot integration initiatives at Capgemini, coordinating with cross-functional and L3 engineering teams on critical incident resolution. In parallel, independently architects, builds, and ships production SaaS and business platforms end-to-end — from discovery and system design through deployment and iteration — for startup and SMB clients across sales operations, workforce management, and marketing/e-commerce. Began his career keeping enterprise infrastructure online across 150+ distributed nodes at a 99.9% uptime target, which grounds his product work in reliability and clean, typed architecture. Comfortable owning the full stack: Next.js/React front ends, Node.js/Java back ends, PostgreSQL/MongoDB data layers, and cloud deployment on AWS/Azure/Vercel.

CORE COMPETENCIES

- Full-Stack Web Development (Next.js, React, Node.js)
- Product Architecture & System Design
- Process Automation & RPA (Python, PowerShell, n8n)
- AI / LLM Integration (OpenAI API, Lang Chain)
- Cloud Infrastructure & CI/CD (AWS, Azure, Docker)
- Database Design (PostgreSQL, MongoDB, Prisma)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: Next.js, React, Redux, Tailwind CSS, Framer Motion

Backend: Node.js, Express, NestJS, Spring Boot, REST APIs

Databases: PostgreSQL, MongoDB, MySQL, Redis, Prisma ORM

Cloud & DevOps: AWS, Azure, Vercel, Docker, CI/CD, Linux

AI & Automation: OpenAI API, LangChain, Python-based RPA, PowerShell, n8n

Other Integrations: Sanity CMS, Razorpay, Stripe, Cloudinary, WebSockets, Medusa.js

PROFESSIONAL EXPERIENCE

Full-Stack Product Engineer — Independent / Freelance

2022 — Present | Remote

- Architected and shipped 5+ production web applications end-to-end — discovery, system design, development, deployment, and ongoing iteration — for startup and SMB clients.
- Engineered a lead-lifecycle SaaS platform (Next.js, PostgreSQL, Prisma) with role-based access control and automated follow-up workflows, cutting client lead-response time by 40% and tripling pipeline visibility for sales managers.
- Built a real-time workforce-monitoring platform (React, Node.js, WebSockets, MongoDB) with a configurable policy-rules engine and sub-100ms optimistic UI updates, reducing unplanned schedule overages by 60% and saving supervisors 12+ hours per week.
- Delivered statically-generated, SEO-optimized marketing sites (sub-1-second LCP) with CMS-driven content and booking/lead-capture flows, generating 12+ inbound leads per month for a tax-consultancy client within 90 days of launch.
- Maintain full ownership of architecture, database design, deployment, and client iteration across a growing pipeline of e-commerce, fintech, and community-platform engagements.

Technical Operations Lead — Capgemini

Apr 2024 — Present | India

- Designed and deployed Python- and RPA-based automation workflows that cut manual processing effort across operational teams.
- Built data-analytics pipelines (Python, Excel macros) to surface KPI trends and inform operational decision-making across global client accounts.
- Led AI/chatbot integration projects to streamline end-user resolution journeys, working cross-functionally with L3 engineering teams on critical incident resolution.
- Architected process-improvement frameworks subsequently adopted across multiple global client accounts.

Infrastructure & Operations Engineer — Indus Towers

Dec 2022 — Jan 2024 | India

- Managed daily operations across 150+ distributed infrastructure nodes against a 99.9% uptime target.
- Applied predictive analytics and root-cause analysis (RCA) to identify and eliminate recurring systemic failures.
- Led the transition to an autonomous smart-operations model, reducing manual intervention by 40%.

- Optimized energy consumption across the node network through data-driven resource planning.

MAJOR PROJECTS & CASE STUDIES

Lead Management System (SaaS · Live)

Business workflow & lead-operations platform

Problem: Sales teams were losing leads in spreadsheets, with no follow-up automation or pipeline visibility.

Solution: End-to-end lead-lifecycle platform with role-based access, assignment rules, automated follow-ups, status pipelines, and real-time analytics.

Tech Stack: Next.js, TypeScript, PostgreSQL, Node.js, Tailwind CSS

- Next.js App Router with server actions for mutations
- PostgreSQL with Prisma for a typed, migration-driven schema
- Role-based middleware enforced at the route layer

Business Impact: 40% faster lead response time; 3x pipeline visibility for sales managers.

Live: sns-ads-erp.vercel.app

BreakIQ (SaaS · Live)

Real-time workforce monitoring for teams & supervisors

Problem: Supervisors had no visibility into team compliance, causing SLA breaches and operational disputes.

Solution: Live status-tracking dashboard with policy enforcement, threshold alerts, and historical per-agent reporting.

Tech Stack: React, Node.js, WebSockets, MongoDB, Express

- WebSocket layer for live agent-status broadcasting
- Time-series storage for break analytics and replay
- Configurable rules engine for per-shift break policies

Business Impact: Reduced unplanned overages by 60%; saved 12+ supervisor hours per week.

Live: breakiq.in

Saran Tax Solution (Website · Live)

Tax-consultancy business website

Problem: An established tax consultancy had zero digital presence and was losing leads to competitors with modern sites.

Solution: SEO-optimized marketing site with service catalog, appointment booking, and a lead-capture funnel.

Tech Stack: Next.js, Tailwind CSS, Sanity CMS, Resend

- Static generation for sub-1s LCP on marketing pages
- Schema.org structured data for rich search results
- Sanity CMS so the non-technical team owns content updates

Business Impact: 12+ inbound leads/month from organic search within 90 days of launch.

Live: sarantaxsolution.com

Pragat Hanuman Ji (Website · Live)

Temple website & devotee community platform

Problem: A temple needed a digital presence for event announcements, donations, and devotee engagement.

Solution: Devotional site with event calendar, donation flow, and live darshan integration.

Tech Stack: Next.js, Tailwind CSS, Razorpay, Cloudinary

- Multi-language (English/Hindi) i18n routing
- Razorpay integration with automated receipt generation
- Cloudinary for optimized devotional imagery

Business Impact: 5x increase in event attendance; enabled global donations from NRI devotees.

Live: pragathanumanji.in

Also in development: Jewelry & Lifestyle Ecommerce — Premium headless-commerce platform (WIP, beta planned Q3) (Next.js, Medusa.js, PostgreSQL, Stripe, Tailwind CSS).

EDUCATION

B.Tech, Electronics & Communication Engineering — BBD National Institute of Technology & Management (BBDNITM), Lucknow (2022)
